IDENTIFIERS *Higher Education Act Title II

ABSTRACT

The 37 funded programs described in this brochure involve bibliographic control, collection development, and preservation of library materials at research libraries, and are designed to make rare materials accessible through bibliographic control and networking. The description of each funded project includes the responsible agent conducting the research library project; the individual responsible for administering the project for the sponsoring institution; the major area of project activity; the amount of money awarded for use during the grant period; the U.S. Department of Education control number; and an abstract summarizing the project goals and activities. Appended tables summarize funding, major activities, and joint projects, and a map showing the states that have benefited from Title II-C since 1976 is included. (EW)

The authority for the Strengthening Research Library Resources Program is Part C of Title II of the Higher Education Act of 1965, Public Law 89-329, as amended by:

The Education Amendments of 1976, Public Law 94-482;

The Education Amendments of 1980, Public Law 96-374; and

The Higher Education Amendments of 1986, Public Law 99-498.

Foreword

"The expansion in the scope of educational and research programs and the rapid increase in the worldwide production of recorded knowledge have placed unprecedented demands upon major research libraries, requiring programs and services that strain the capabilities of cooperative action and are beyond the financial competence of individual or collective library budgets."

With these words, Congress, in the Education Amendments of 1976, launched the HEA Title II-C, Strengthening Research Library Resources Program. In the ten years since its enactment, the accomplishments of this program, which span the continent and, in some instances, the world, are many-faceted and exciting. Imagine a walk through the Newspaper Archives of the Boston Public Library with its 35,000 volumes of original newspapers. Or a visit to an exhibit from the revitalized Poster Collection in the Hoover Institution Archive, a prized historical treasure representing notable artists from around the world that documents the efforts of official and underground agencies to mobilize the public in time of crisis. Or discovering through an on-line search that microform copies of the medieval Slavic manuscripts you need are held at Ohio State University and are available for use on site or through interlibrary copying. These activities and many others of equal import have been supported with HEA Title II-C funds.

This brochure describes briefly the projects funded in fiscal year 1987, including valuable summary data in table form which provide further insight into program activities. As in previous years, this slate reflects a diversity of subject matter and design in the effort to make rare material accessible through bibliographic control and networking, through preservation, and through augmentation of already strong and unique collections. Making rare material accessible is not cost free. The Title II-C money has provided the incentive for sharing.

Introduction

This booklet contains information on grants funded by the Higher Education Act, Title II-C Program to assist major research libraries throughout the nation. The booklet contains:

- Descriptions of each funded project, including

  (1) The responsible agent conducting the research library project;

  (2) The individual responsible for administering the project for the sponsoring institution;

  (3) The major area of project activity;

  (4) The amount of money awarded for use during the grant period;

  (5) The U.S. Department of Education control number; and

  (6) An abstract summarizing the project goals and activities.

- Appendix tables showing funding and major activities of institutions.

Institution	American Antiquarian Society 185 Salisbury Street Worcester, MA 01609
Project Director	Alan Degutis Head, Cataloging Services
Program Focus	Bibliographic Control
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$109,260
Grant Number	G008610209

Abstract

The American Antiquarian Society (AAS) possesses the world's best collection of early American imprints and newspapers. From 1955 to about 1965 its staff edited the microform series *Early American Imprints: First Series (Evans)*, published by Readex Microprint Corporation, which included the text of every available book, pamphlet, and broadside printed in the United States from 1640 to 1800. This microform series has proven to be of great value to scholarship, but full access to it has been hampered by a lack of adequate cataloguing. AAS will continue to produce full MARC cataloging of the microform set, which will be entered into national databases and made available to individual libraries.

Institution	American Museum of Natural History Department of Library Services Central Park West and 79th Street New York, NY 10024
Project Director	Nina J. Root Chairwoman
Program Focus	Preservation
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$199,661
Grant Number	G008610216

Abstract

The Library of the American Museum of Natural History will continue to microfilm, restore, and conserve some 80 unique scientific and historic ledgers, scrapbooks, field diaries and notebooks, and specimen catalogs from scientific expeditions, fieldwork, and laboratory work, which form a unique record of the development of science and a major scientific institution in the United States. These records are used daily for the curation of collections and in scientific research; therefore, hard copies will be provided, while the unique manuscripts, some dating from 1815, will be preserved, catalogued into OCLC, and made accessible to the scholarly community.

Institution	Boston Public Library 666 Boylston Street Boston, MA 02117
Project Director	B. Joseph O'Neil Supervisor of Research Library Services
Program Focus	Preservation
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$210,000
Grant Number	G008745315

Abstract

The Boston Public Library will continue its program of preserving all Massachusetts newspapers on microfilm. Papers to be in most need of immediate preservation attention (revealed by a survey of over 2,000 repositories) will be filmed and a positive copy will be returned to the cooperating institution. The negative will be stored in the Library's ultrasecurity vault, a positive copy made available for public use by the Library, and the original papers wrapped in acid-free paper and placed in storage. Film will be checked to make sure it meets preservation microfilm standards. Regularly updated editions of *Newspapers on Microfilm in the Boston Public Library* will be produced and distributed.

Institution	Brown University Box A University Libraries Providence, RI 02912
Project Director	Merrily E. Taylor University Librarian
Program Focus	Bibliographic Control
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$210,000
Grant Number	G008745308

Abstract

The John Hay Library at Brown University is one of the major libraries in the United States devoted exclusively to special collections. Foremost among its collections are the Harris Collection of American Poetry and Plays, the McLellan Lincoln Collection, and the Anne S. K. Brown Military Collection.

This project will begin the retrospective conversion of the monographic holdings of the John Hay Library using the services of an outside retrospective conversion vendor. Over 70,000 bibliographic records will be converted, of which 50,000 will be from the Harris Collection of American Poetry and Plays and 20,000 from the other collections in the John Hay Library. The conversion work will be done under contract by the OCLC RETROCON Service and the records created will also be tape-loaded into the Research Libraries Information Network (RLIN).

Institution	Center for Research Libraries 6050 South Kenwood Avenue Chicago, IL 60637
Project Director	Donald B. Simpson President
Program Focus	Preservation
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$119,549
Grant Number	G008745324

Abstract

This project will complete the preservation microfilming of Ethnic Newspapers held by the Center for Research Libraries (CRL).

The Center for Research Libraries will microfilm all ethnic newspaper files in its collection that are not already preserved on film. It will include all titles held by CRL which cover the ethnic groups from Southern, Central, and Eastern Europe that emigrated to the United States in large numbers in the late 19th and early 20th centuries. Included will be titles in Arabic, Chinese, Danish, French, German, Japanese, Norwegian, Persian, Spanish, Swedish, and Yiddish. A total of 92 titles have been identified that are in need of preservation.

Institution	Dartmouth College Library P.O. Box 7 Hanover, NH 03755
Project Director	John R. James Director of Collection Development and Bibliographic Control
Program Focus	Bibliographic Control and Preservation
Grant Period	10/1/87-12/31/88
FY 87 Funding	$249,818
Grant Number	G008610217

Abstract

This is the third and final year of this project, which will continue to improve accessibility and availability of the Dartmouth College Library collections in theatre and the performing arts, consisting of monographs, periodicals, newspapers, scripts, libretti, programs, playbills, scrapbooks, slides, sheet music, and other materials providing primary source materials for research in the performing arts. The collections contain some 48,000 individual items falling into four major categories: (1) plays, (2) playbills, (3) nonbook materials, and (4) sheet music.

Machine-readable records in the MARC format will be prepared and the records made available in the RLIN and OCLC shared cataloging databases and in the Dartmouth On-line Catalog. The shelf life of the materials in these collections will be extended throughout the application of various conservation and preservation operations.

Institution	George Washington University Gelman Library 2130 H Street, NW Washington, DC 20052
Project Director	William B. Keller Head, Special Collections Department
Program Focus	Bibliographic Control
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$71,836
Grant Number	G008745318

Abstract

George Washington University's Gelman Library will provide bibliographic control and finding aids for research resources relevant to the history and culture of Washington, DC. The project is in response to a 1985 National Historical Publications and Records Commission-sponsored study revealing that access to the rich research resources in Washington, DC was hampered by severe deficiencies in bibliographic control, finding aids, and interinstitutional cooperation.

The project will determine, on a collection-specific level, the existence, condition, and current accessibility of resources in specified public and private institutions in the Washington metropolitan area. Gelman Library will build an interinstitutional subject database on bibliographic information to facilitate research. The project will also provide recommendations for ongoing interinstitutional coordination of bibliographic control and collection processing.

Institution	Harvard University Cambridge, MA 02138
Project Director	Sidney Verba Director of the Library
Program Focus	Bibliographic Control and Preservation
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$110,000
Grant Number	G008745443

Abstract

The Harvard University Library will improve bibliographic control of its collection of master negative microfilms preparatory to publication of special lists for input into national databases. It will also film some 270,000 pages of valuable research materials that are too rare or fragile for lending. Specific collections to be filmed are in business (10K reports of the Securities and Exchange Commission), church history (American Unitarian Association letterbooks and records of the Society for Printing Theological Education), history of higher education (Harvard Commencement parts and exhibitions, 1649 to date), and a pilot project in European newspapers. This grant will disseminate information on what has been accomplished, and will further the development of a sound program for addressing the urgent problem of deteriorating research materials.

Institution	Indiana University University Libraries Bloomington, IN 47401
Project Director	David E. Fenske Head, Music Library
Program Focus	Bibliographic Control and Preservation
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$103,080
Grant Number	G008745323

Abstract

The Indiana University Libraries will increase nationwide bibliographic access and availability of Indiana University's extensive collection of operatic records by cataloging 50,000 sound recording titles of operas and opera excerpts new to the music library's collection, using the OCLC database. This project will make available and conserve preeminent collections of international opera materials housed in the School of Music Library that are primary resources for performers, scholars, and researchers around the world. Approximately 1,825 new records will be added to the database. The authority records will be submitted to the Library of Congress (LC) as part of its Name Authority Cooperative Project (NACO), and the headings added to LC's name authority file for national distribution.

Institution	Missouri Botanical Garden Library P.O. Box 299 St. Louis, MO 63166
Project Director	Constance P. Wolf Librarian, and John Reed Vice President for Education New York Botanical Garden
Program Focus	Bibliographic Control
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$250,000
Grant Number	G008610198

Abstract

This project will continue to increase the accessibility for the nation's research and academic library community to the extensive collections of plant science literature held in the libraries of the Missouri Botanical Garden and the New York Botanical Garden, the nation's two most comprehensive botanical libraries. This will be accomplished by continuing the program of shared recataloging and OCLC entry begun by the two libraries in October 1978, whereby cataloging and holdings records for both libraries are entered into the OCLC database.

Institution	New York State Library Cultural Education Center Empire State Plaza Albany, NY 12230
Project Director	James Corsaro Senior Librarian
Program Focus	Bibliographic Control
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$50,575
Grant Number	G008745320

Abstract

The New York State Library, through its Manuscripts and Special Collections unit, will catalog its unique manuscript collections and input the catalog data into the Research Libraries Group's national database, Research Libraries Information Network (RLIN), making this information more readily available to the national research public. In addition, the data will later be loaded into the State Library's local system, the Collection Management System (CMS), providing an on-site, user-friendly, on-line public catalog to these manuscript holdings.

The Library will implement the USMARC Archives and Manuscripts Format (AMC) for the retrospective conversion cataloging of these unique resources.

Institution	Northwestern University University Library Evanston, IL 60201
Project Director	Janet Susan Hill Head, Catalog Department, and Andrea L. Stamm Head, Africana Cataloging
Program Focus	Bibliographic Control
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$119,784
Grant Number	G008745304

Abstract

Bibliographic data for 30,000 monographs in the Melville J. Herskovits Library of Africana will be converted to machine-readable form. These 30,000 records represent the last remaining cataloged titles in the Herskovits Collection for which machine-readable data is not available. An additional 1,500 titles, for which only brief cataloging is currently available, will be upgraded to full cataloging standards. These titles will be selected according to their value to the research community and the degree to which full cataloging will enhance intellectual access to them. All 31,500 bibliographic records will be made available on tape to the major North American bibliographic networks, thus affording scholars nationwide with readily available access to the resulting information. Northwestern University Library's liberal interlibrary loan and on-site use policies will assure ready physical access to the resources described.

Institution	Ohio State University 1314 Kinnear Road Columbus, OH 43212
Project Director	Jill Patzer Director of Libraries
Program Focus	Bibliographic Control and Preservation
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$70,000
Grant Number	G008610207

Abstract

This project will preserve and provide on-line bibliographic access to the unique collection of medieval and medieval tradition (13th through 20th century) Slavic Cyrillic manuscripts in microform in the Hilander Research Library of Ohio State University (OSU). OSU will continue to catalog the collection on the OCLC system, employing the standard MARC format, observing all conventions of AACR2. Bibliographic records thus created will be copied to a discrete archive tape. This tape and the computer-output microform produced from it will allow these data to be provided to RLIN and other bibliographic networks, to individual scholars, and to research centers in the United States and abroad. It will also be the basis of the derivative bibliographic publications.

Institution	Ohio University Athens, OH 45701
Project Director	Dr. Hwa-Wei Lee Director of Libraries
Program Focus	Bibliographic Control
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$101,000
Grant Number	G008745322

Abstract

The Ohio University Alden Library will increase national accessibility of significant research resources on Southeast Asia by cataloging and inputting 4,000 titles into the OCLC international on-line union catalog. Included will be over 3,500 titles from the Library of Congress Jakarta Office Southeast Asia Microfiche, 1981 - 1985, as a Major Microform Project (MMP), and continuing a previous MMP project covering 1978 - 80. As an MMP, records will be available also to the other national centers holding the fiche. With one-half the monographs and one-quarter of the serials acquired from Indonesia available only in this fiche collection, full bibliographic access is essential for research on the world's fifth most populous nation. The library has focused primarily on materials covering Indonesia, Malaysia, Singapore, and Brunei, and to a lesser extent, Thailand and the Phillipines.

Institution	Southern Illinois University Morris Library Carbondale, IL 62901
Project Director	David V. Koch Curator of Special Collections and University Archivist, and Kenneth G. Peterson Dean of Library Affairs
Program Focus	Bibliographic Control and Preservation
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$130,000
Grant Number	G008745314

Abstract

Morris Library will catalog seven First Amendment Freedom collections—including the Ralph E. McCoy Freedom of the Press Collection and the Theodore Schroeder Papers and Library—making available to scholars unique and important collections of over 10,000 volumes, rare and fugitive pamphlets and printed ephemera, briefs, correspondence, and manuscripts relating to the First Amendment freedoms dating from the 17th Century to the present. Records will be entered into OCLC and the Illinois Library Computer System (LCS). Data will also be incorporated into an in-house microcomputer database that will provide subject access on demand. Fundamental conservation measures, including selective microfilming, will be applied to assure long life for the materials plus optimal availability for researchers.

Institution	Stanford University Stanford University Libraries Stanford, CA 94305
Project Director	Cynthia Gozzi Director of Technical Services
Program Focus	Bibliographic Control
Grant Period	10/31/87 - 12/31/88
FY 87 Funding	$463,805
Grant Number	G008610200

Abstract

In order to provide machine-readable catalog records for research libraries throughout the nation, authority records for the Name Authority File, and increased access for its own users, Stanford University will continue to create and input into the RLIN database bibliographic records with multiple access points and NACO headings for the individual titles of the microfilm set *Goldsmiths'-Kress Library of Economic Literature*, Segment 1 and supplement, published by Research Publications.

Institution	Stanford University Hoover Institution Encina Hall Stanford, CA 94305
Project Director	Judith Fortson Conservation Officer
Program Focus	Preservation
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$280,000
Grant Number	G008610232

Abstract

The Hoover Institution possesses a Poster Collection totalling approximately 68,000 items: illustrated wall placards, official proclamations, and propaganda of various other types. The newspaper collection also serves as a frequent primary source for scholarly investigation. The papers are of particular significance since they represent, in many instances, the only available record dealing with specific events during times of political unrest or development.

In order to preserve these holdings, the Hoover Institution will continue a brittle document preservation program that includes two basic components for dealing with the two separate groups of materials. Color slides (use copies plus preservation copies) are made of the posters, using Kodachrome film. Selected posters receive applied treatment, and all posters are encapsulated, catalogued, and indexed on-line. The newspapers are being microfilmed, with subsequent catalogue entries in RLIN.

Institution	Stanford University Hoover Institution Stanford, CA 94305
Project Director	Charles Palm Associate Director for Library and Archives
Program Focus	Bibliographic Control and Preservation
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$134,244
Grant Number	G008745307

Abstract

This project will preserve and broaden access to the Hoover Institution's collection of contemporary published sources on the Russian Revolution. The project entails microfilming and cataloging all primary source material published between 1905 and 1930 for the study of the Russian Revolution and Civil War.

The Hoover collection on the 1917 revolution, the Provisional Government, and the Civil War is probably the greatest such collection in the West. The collection also includes important material on the First Russian Revolution of 1905.

Microfilm will be made according to strict archival standards and cataloging will be entered in the national database of the Research Libraries Group.

Institution	State Historical Society of Wisconsin Library 816 State Street Madison, WI 53706
Project Director	John A. Peters Acting Head Librarian
Program Focus	Bibliographic Control and Preservation
Grant Period	10/1/87–9/30/88
FY 87 Funding	$125,000
Grant Number	G008745309

Abstract

The Library of the State Historical Society of Wisconsin is processing its "Cutter Pamphlet" collection into its current pamphlet collection, which is being fully catalogued and carefully conserved with material collected from 1967 to the present. The Cutter Pamphlets are a general collection of unbound ephemera, emphasizing United States and Canadian social and cultural history, collected by the Library from 1854 to 1966. Much of the collection is not fully catalogued and much shows signs of wear and deterioration.

This project is making the collection more accessible to researchers by preserving by appropriate methods materials in need of basic conservation measures, and by entering full MARC records into OCLC for all items not now in that database.

Institution	State University of New York, Buffalo University Libraries Buffalo, NY 14260
Project Director	Barbara Von Wahlde Director, University Libraries
Program Focus	Bibliographic Control
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$155,000
Grant Number	G008745313

Abstract

The Libraries of the State University of New York at Buffalo will create 5,500 machine-readable records for monographs in the microform sets that comprise the *Latin American Documents* collection.

Titles in this collection are primarily 19th and 20th century publications in all subject areas that are in the public domain. The collection also includes later editions of works originally published in the 16th, 17th, and 18th centuries which are recorded in Jose Toribio Medina's *Bibliotheca-Hispanoamericana, 1493 - 1810.*

Records created during the project will be entered into the Research Libraries Information Network (RLIN) and tape loaded into OCLC. The items in this collection will be available through interlibrary loan. The SUNY at Buffalo Libraries will provide access to items which are no longer available in paper editions or which exist in very fragile physical condition.

Institution	University of California, Berkeley Berkeley, CA 94720
Project Director	Joseph A. Rosenthal University Librarian, and Donald Shively Head, East Asiatic Library
Program Focus	Bibliographic Control and Preservation
Grant Period	10/1/87-9/30/88
FY 87 Funding	$153,259
Grant Number	G008745312

Abstract

This project will make known and usable to scholars everywhere two collections of Japanese books that are unique outside of Japan. One is formerly of the Mitsui Library, published between 1868 and 1949, and the second group is contemporary Japanese literature and criticism selected from the personal library of Endo Shusaku, one of Japan's most distinguished living writers. These two collections will be catalogued and the bibliographic records will be sent to RLIN, OCLC, or both. Conservation care will be given as needed to the Mitsui books and to a collection of 2,877 Japanese manuscript titles (over 7,000 volumes) dating from the 14th to the early 20th century so that their usable life can be extended for many more centuries.

3/6

Institution	University of California, Berkeley Berkeley, CA 94702
Project Director	Joseph A. Rosenthal University Librarian, and James D. Hart Director, Bancroft Library
Program Focus	Bibliographic Control
Grant Period	10/1/87-9/30/88
FY 87 Funding	$249,414
Grant Number	G008745306

Abstract

The Bancroft Library Retrospective Conversion Project will make research materials in the Bancroft Library available to scholars by converting 50,000 card catalog records for printed materials into machine-readable form. Records created during the project will be entered into the national databases of OCLC and RLIN, the MELVYL on-line union catalog of the University of California, and Berkeley's GLADIS on-line catalog. The Bancroft Library is comprised of two collections of internationally recognized distinction: The Bancroft Collection of Western Americana, including materials on Mexico and Central America; and the Rare Books Collection, encompassing extensive manuscript holdings and important printed collections in the areas of early printing, modern poetry, western authors, small press imprints, history of science, and numerous other fields. At least 60 percent of the records converted will be new to the national databases.

Institution	University of California, Los Angeles University Library 405 Hilgard Avenue Los Angeles, CA 90042
Project Director	James M. K. Cheng Head, Richard C. Rudolph Oriental Library
Program Focus	Bibliographic Control and Preservation
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$140,000
Grant Number	G008745310

Abstract

Using the OCLC-CJK system, this project will create on-line bibliographic records in the vernacular for 2,450 rare titles in Japanese fine arts. The interdisciplinary nature of these materials is such that they will be of interest not only to art historians and artists, but also to scholars in Japanese history, culture, sociology, anthropology, language, and literature. The records will be available through the OCLC database and through production of a printed guide. Appropriate preservation treatment (rebinding, protective casing, or microfilming) will be provided for those materials which require it.

Institution	University of California, Riverside Riverside Library Riverside, CA 92517
Project Director	Nancy Douglas Head, Cataloging Department, and George Slusser Curator, Eaton Collection
Program Focus	Bibliographic Control
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$155,000
Grant Number	G008745311

Abstract

The University of California, Riverside will catalog 10,000 titles of the Eaton Collection of Science Fiction and Fantasy Literature to achieve full bibliographic control of this exceptional collection. The remaining backlog of 10,000 Eaton titles will be cataloged through the OCLC bibliographic network. Bibliographic records will be produced in accordance with the *Anglo-American Cataloguing Rules* (2nd. ed.) and the cataloging policies and practices of the Library of Congress. The resulting bibliographic records will be disseminated as a supplement to the new edition of the 1983 3-volume Eaton Catalog published by G.K. Hall. The cataloging project will provide increased bibliographic control for a collection receiving ever-increasing attention and use, make the entire collection accessible, and introduce unique entries into the national database, especially in the area of foreign-language science fiction and fantasy.

Institution	University of California, San Diego Library La Jolla, CA 92093
Project Director	Dorothy Gregor University Librarian
Program Focus	Bibliographic Control, Collection Development and Preservation
Grant Period	10/1/87 – 12/31/88
FY 87 Funding	$141,283
Grant Number	G008745444

Abstract

This project will strengthen a unique national research resource, the Archive for New Poetry at the University of California, San Diego (UCSD), and extend access to these materials to the international scholarly community through cataloging and dissemination of information. The cataloging component of this project will create or enhance more than 14,000 bibliographic records in the OCLC database; 4,000 new names will be added to the national authority file through the NACO Project. An important feature of the project will be the preparation of a collection-level brochure describing the Archive for New Poetry and a union index to all 40 manuscript collections. The entire collection of more than 650 audio tapes will be content indexed. The preservation encompasses microfilming, audio recording, photocopying, and encapsulation, and will make some endangered materials available for scholarly research for the first time.

Institution	University of California, Santa Barbara University Library Santa Barbara, CA 93106
Project Director	Joseph A. Boisse University Librarian, and Cecily Johns Associate University Librarian
Program Focus	Bibliographic Control
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$77,000
Grant Number	G008745303

Abstract

This project will make available to scholars and researchers nationally a unique collection of over 50,000 trade catalogs from the late 19th, but primarily the 20th century. The collection was assembled by Lawrence B. Romaine, author of *A Guide to American Trade Catalogs 1744-1900*, the definitive bibliographic guide in the field. The collection is a powerful resource for the study of American technological history as seen through the items represented in the catalogs, but it also provides primary source materials for many other disciplines, including history of architecture and industrial design, economic anthropology, environmental studies, agriculture, social and cultural history. Through this project, on-line bibliographic records in AMC-MARC format will be created and input into the national database, RLIN, providing access to scholars by both subject and manufacturer, the most common and useful approaches to trade catalog literature.

Institution	**University of Hawaii at Manoa** **University Library** **Honolulu, HI 96822**
Project Director	**John R. Haak** **University Librarian**
Program Focus	**Preservation**
Grant Period	**10/1/87 - 12/31/88**
FY 87 Funding	**$45,000**
Grant Number	**G008745446**

Abstract

This project will enable the University of Hawaii, Manoa Library to microfilm and thus preserve Pacific Island and Asian newspapers, and enhance scholarly access to these primary research resources.

The principal activity will be to microfilm newspaper titles published in the Pacific Island nations which are uniquely held in the United States by the University of Hawaii Library. This project will preserve a resource that is vulnerable to deterioration from environmental conditions and provide for the potential dissemination of microfilm copies to other research libraries throughout the world.

Availability of these microfilm titles and purchase information will be provided to research libraries throughout the United States, to academic institutions in the countries of their origin, and to research libraries in the regions involved.

Institution	University of Illinois at Urbana-Champaign Library Urbana, IL 61801
Project Director	Nancy O'Brien Acting Education and Social Science Librarian
Program Focus	Collection Development, Bibliographic Control and Preservation
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$141,969
Grant Number	G008745447

Abstract

This University of Illinois at Urbana-Champaign (UIUC) project will make available to the entire nation through interlibrary loan the historical resources of curriculum materials from 1880 to date that have shaped educational policies and practices in the United States.

Proposed is a center acquiring, maintaining, retaining, and circulating the primary materials used in classrooms from the 1800's to the present through local, State, and national networks. UIUC has approximately 12,000 uncataloged textbooks from this time period and anticipates acquisitions of many more through a variety of sources. At present, the UIUC Library has approximately 8,000 volumes of pre-1975 uncataloged curriculum materials. These materials will form the nucleus of the national resource of historical curriculum materials.

Institution	University of Illinois Agriculture Library 506 South Wright Street Urbana, IL 61801
Project Director	Carol Boast Agriculture Librarian
Program Focus	Bibliographic Control
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$219,404
Grant Number	G008610211

Abstract

This project will continue a retrospective cataloging and indexing program to strengthen the research collections of the University of Illinois Agriculture Library, and to improve national and international access to hard copy sets of United States Department of Agriculture and State experiment station agricultural materials from 1862 to date through series analytics on the OCLC and RLIN database and indexing on the AGRICOLA and AGRIS databases. This project comprises the retrospective portion of a nationwide program implemented by the National Agricultural Library in 1985 and will continue this work for 1987 onward.

Institution	University of Kansas Libraries Lawrence, KS 60645
Project Director	Sheryl Williams Curator, Kansas Collection
Program Focus	Bibliographic Control
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$126,451
Grant Number	G008610203

Abstract

The University of Kansas Libraries will continue the cataloging of ephemeral materials contained in the Wilcox Collection of Contemporary Political Movements, an outstanding special collection of American extremist political literature. Acquired in 1965, the Collection has grown dramatically over the years and includes books, pamphlets, serials, tapes, manuscripts, and political ephemera relating to approximately 7,000 left-wing and right-wing organizations from the 1950s to the present. At the completion of this project, approximately 4,000 serial titles and 50,000 pieces of ephemera will be cataloged and made nationally accessible through the OCLC database. Thus, this project will provide access to unique primary resources which will support research in the areas of history, political science, sociology, psychology, American studies, and journalism.

Institution	University of Maryland Libraries College Park, MD 20742
Project Director	Marietta A. Plank Associate Director for Technical Services
Program Focus	Bibliographic Control
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$408,837
Grant Number	G008610196

Abstract

The University of Maryland College Park (UMCP) Libraries, in cooperation with the University of Delaware Library, Texas A&M University Library, and the New York State Library, will continue to provide machine-readable cataloging records for Segment 2 of the microfilm collection *Goldsmiths'-Kress Library of Economic Literature*, which consists of 29,412 titles. The cataloging for this collection will be produced in full MARC format in accordance with AACR2 description, LC Subject Headings, and OCLC Level I Bibliographic Input Standards. The bibliographic records will be input into the OCLC database for immediate access by the more than 4,000 libraries participating in OCLC, and eventually by non-OCLC libraries. As a NACO participant, UMCP will also contribute authority records for all names not currently in the name authority file distributed by the Library of Congress. The subject and descriptive cataloging will be divided among the four participating libraries.

Institution	University of Rochester Eastman School of Music Sibley Music Library 26 Gibbs Street Rochester, NY 14604
Project Director	Mary Wallace Davidson Librarian
Program Focus	Bibliographic Control
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$455,146
Grant Number	G008745305

Abstract

The Associated Music Libraries Group, comprising the Eastman School of Music of the University of Rochester, Harvard University, Indiana University, Stanford University, the University of California at Berkeley, the University of Illinois at Urbana-Champaign, and Yale University will initiate retrospective conversion of 48,130 manual bibliographic records for printed music for entry into OCLC and RLIN networks. The standards used will be the National Retrospective Conversion Plan for Music developed by the Council on Library Resources in September 1984. The project will benefit scholars seeking resources and other music libraries contemplating their own retrospective conversion projects by significantly increasing the number of available bibliographic records for music materials in this vast national on-line union catalog.

Institution	University of South Carolina Thomas Cooper Library Columbia, SC 29208
Project Director	Kenneth E. Toombs Director of Libraries
Program Focus	Bibliographic Control
Grant Period	10/1/87–12/31/88
FY 87 Funding	$55,000
Grant Number	G008745317

Abstract

The Thomas Cooper Library will catalog a collection of 800 rare and significant serials and maps from its rare books and special collections departments and provide analytic cataloging for the approximately 7,500 titles within that special serials collection. Cataloging will be entered into the OCLC database, subsequently providing scholarly access to these specialized collections on a national and international scale. Random sampling of the collection shows that 95 percent of the titles are not in OCLC. The focus of the project should add approximately 7,980 unique titles to the OCLC database and significantly enhance the holdings of another 320 titles.

Institution	University of Utah Mariott Library Salt Lake City, UT 84112
Project Director	Roger Hanson Director of Libraries
Program Focus	Bibliographic Control
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$41,340
Grant Number	G008745316

Abstract

The University of Utah Libraries will improve access to the machine-readable data files of the Inter-university Consortium for Political and Social Research (ICPSR). By using the set mechanism at OCLC, updating to current standards all existing cataloging records for the ICPSR collection, cataloging where it is currently lacking, and making the data available in machine-readable and card catalog formats through OCLC set distribution service will be accomplished.

The project will provide bibliographic access to microform sets and apply them to an increasingly important new format, machine-readable data files of statistical information. ICPSR will add the cataloging data in machine-readable form to their on-line catalog, whether or not they own the complete ICPSR collection.

Institution	University of Vermont Bailey Howe Library Burlington, VT 05405
Project Director	Nancy L. Eaton Director of Libraries, and Rodney Goins Collection Development Librarian
Program Focus	Bibliographic Control and Preservation
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$94,286
Grant Number	G008745321

Abstract

The University of Vermont has a notable major interdisciplinary Canadian collection and is a selective Canadian depository. As such, it will acquire original copies or photocopies of all the Canadian documents on acid rain and will catalog them into the OCLC database. The documents will then be scanned and digitized and CD-ROM discs produced for preservation of the documents as a cohesive full-text database on acid rain. The CD-ROM discs will be distributed to 40 land-grant libraries that already own CD-ROM equipment.

Institution	University of Virginia McIntire Department of Music Library 112 Old Cabell Hall Charlottesville, VA 22903
Project Director	Marita P. McClymonds Associate Professor of Music
Program Focus	Bibliographic Control
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$89,999
Grant Number	G008745319

Abstract

The Music Library and the McIntire Department of Music of the University of Virginia will establish a model for the cataloging of pre-1900 librettos by cataloging 3,000 previously uncataloged Italian 19th century librettos from the Albert Schatz Collection of the Library of Congress into the Research Libraries Information Network (RLIN) of the Research Libraries Group (RLG). The proposed project will be carried out under the aegis of the U.S. Committee on RISM (Repertoire International des Sources Musicaes—the International Inventory of Music Sources) and represents the first year of a multiyear project.

Institution	University of Washington Seattle, WA 98185
Project Director	Gary L. Menges Head, Special Collections and Preservation Division
Program Focus	Preservation and Bibliographic Control
Grant Period	10/1/87 - 12/31/88
FY 87 Funding	$144,000
Grant Number	G008745445

Abstract

The University of Washington Libraries contain extensive collections of materials for the study of theater history and drama and a large collection of historical photographs. This project will focus on a photographic resource for the study of American theatrical history: the J. Willis Sayre Historical American Vaudeville and Theater Photograph Collection. Presently, scholarly access to the Sayre collection is limited and the collection is in danger of deterioration. The goal of this project is to improve access to and assure the preservation of this important collection. The project includes indexing the photographs using a microcomputer, creating an optical videodisc from the photographs, linking the microcomputer database with the videodisc, and making available for purchase the videodisc and the microcomputer database to scholars and to other research collections.
